Full-Stack Development | Software Engineering | Web Development | AWS Cloud Practitioner

Full-Stack Developer experienced in designing, developing, and maintaining modern web applications using React, TypeScript, NodeJs, NestJS, PHP, and Laravel. Proficient in building user-centric solutions, implementing best development practices, and delivering high-quality software through testing and continuous improvement. Enthusiastic about emerging technologies, including cloud computing, and AI-assisted development, with a focus on improving productivity and engineering excellence.

- Systems Development
- Software Implementation
- Computer Engineering
- Agile Development
- Code Maintenance
- Technical Troubleshooting
- Debugging & Research

PROFESSIONAL EXPERIENCE

Software Engineer | Assuresoft, Santa Cruz, Bolivia

08/2025 – 06/2026

- Engineered and maintained scalable full-stack applications using React, NodeJs, TypeScript, Laravel, and PHP, aligning business requirements with secure and maintainable software solutions.
- Designed and implemented robust RESTful APIs and backend services, enabling secure and efficient communication across distributed systems.
- Contributed to the development of a multi-tenant automotive e-commerce platform supporting wholesale and retail operations, inventory management, order processing, and online storefront experiences.
- Collaborated in Agile/Scrum environments, actively participating in technical architecture discussions, system enhancements, and peer code reviews to ensure high-quality software delivery.
- Technology Used: React, Typescript, JavaScript, Express, NodeJs, Laravel, PHP, MySQL, PostgreSQL, React, Git, GitFlow.

Digital Academy Trainee | Assuresoft, Santa Cruz, Bolivia

03/2025 – 08/2025

- Selected among top applicants for AssureSoft's "Academia Digital," an intensive, highly competitive software engineering training program.
- Received rigorous hands-on training in full-stack architectures, object-oriented programming, and production-ready system design.
- Developed enterprise-level capstone projects under senior engineer mentorship, solidifying modern cloud patterns, React, and NodeJs.
- Mastered Agile methodologies (Scrum), control version (Git), and SOLID/Clean Code principles to guarantee software scalability.

Software Developer | Dismatec, Santa Cruz, Bolivia

06/2024 – 03/2025

- WhatsApp Bot Developer, Report Automation, and Mass Messaging Software Developer.
- Utilized React, TypeScript and NodeJs to enhance both front-end and back-end functionalities
- Technology Used: TypeScript, NodeJs, Express, React, MySQL Database, Swagger UI, WhatsApp API, DialogFlow, GitHub.

Software Developer Intern | Assuresoft, Santa Cruz, Bolivia

04/2023 – 08/2023

- Internship completed collaborating on a project as a full stack developer.
- Technology Used: TypeScript, NestJs, Angular, PostgreSQL Database, Swagger UI, GitHub.
